

*Changing Brains, Changing Lives Symposium* is a collaborative effort with valley wide partners to provide the Roaring Fork Valley with an educational opportunity for community members, professionals, and mental health workers to increase their emotional literacy and empower their understanding and awareness of mental health for them self, family, and community. The symposium focuses on the neurosciences of the brain providing education and strategies to support and enhance our ability to be present in this moment and resilient to future challenges.

Our 2019 SYMPOSIUM theme of COMMUNICATION will continue to promote a lasting message that CONNECTION is vital to our community's collective and individual wellbeing. Sharing our story is one way to instill connection among us.
